Why Choose EST4

EST4 is a modular fire and life safety system designed to meet the needs of standalone single panel systems or multi-panel networks. Life safety functions including fire alarm, audio, mass notification all use similar fundamental components, simplifying system layouts. EST4 is a superbly adaptable life safety system, lending itself to medium and large building applications.

EST4 offers solutions that reduce waste by repurposing many EST3 components and thus extending the lifecycle of existing system components through backwards compatible designs.

Target Application/Market Segment
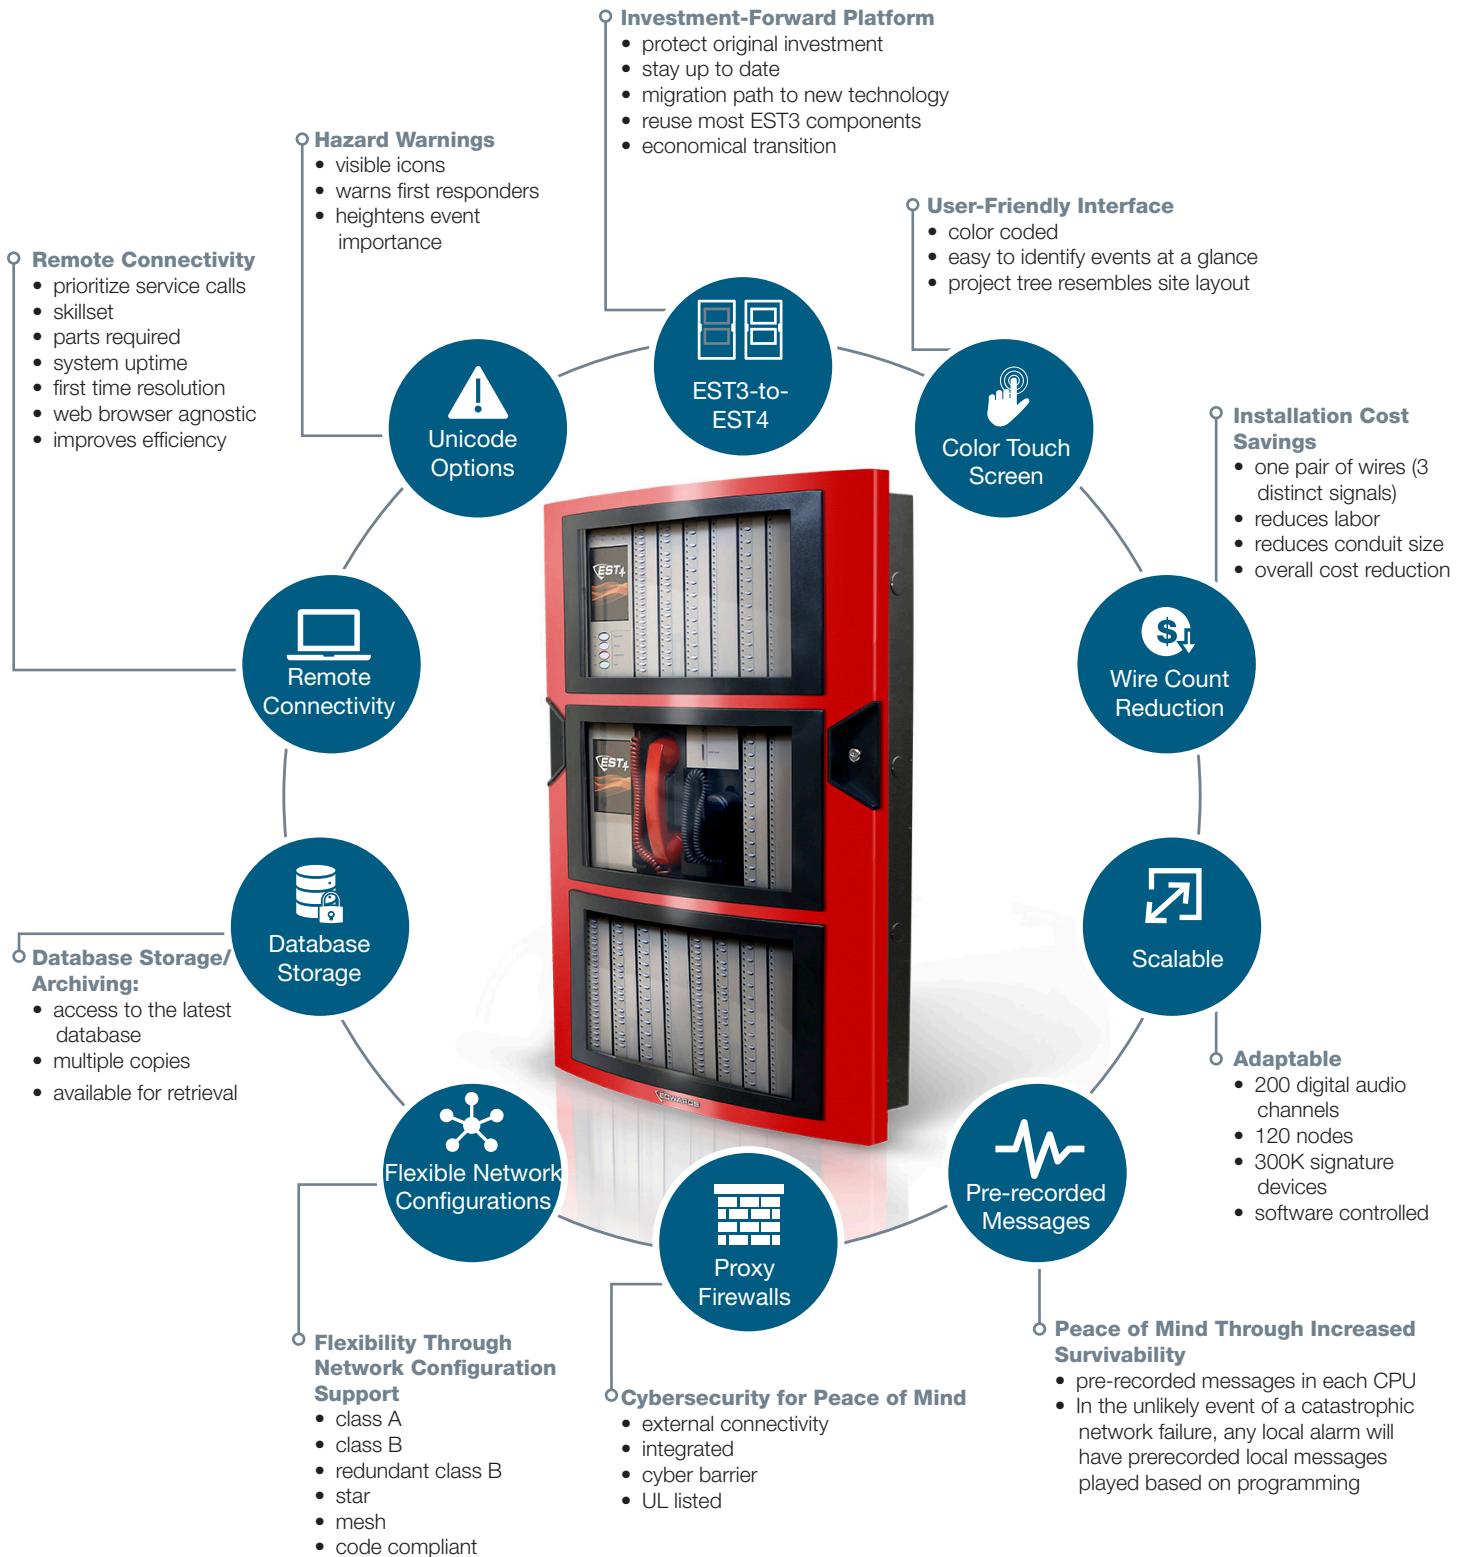

Scalable for small, to mid, to large application.

EST4: FEATURES AND BENEFITS

Investment-Forward Platform
- protect original investment
- stay up to date
- migration path to new technology
- reuse most EST3 components
- economical transition

Hazard Warnings
- visible icons
- warns first responders
- heightens event importance

User-Friendly Interface
- color coded
- easy to identify events at a glance
- project tree resembles site layout

Remote Connectivity
- prioritize service calls
- skillset
- parts required
- system uptime
- first time resolution
- web browser agnostic
- improves efficiency

Installation Cost Savings
- one pair of wires (3 distinct signals)
- reduces labor
- reduces conduit size
- overall cost reduction

Database Storage/ Archiving:
- access to the latest database
- multiple copies
- available for retrieval

Adaptable
- 200 digital audio channels
- 120 nodes
- 300K signature devices
- software controlled

Flexibility Through Network Configuration Support
- class A
- class B
- redundant class B
- star
- mesh
- code compliant

Cybersecurity for Peace of Mind
- external connectivity
- integrated
- cyber barrier
- UL listed

Peace of Mind Through Increased Survivability
- pre-recorded messages in each CPU
- In the unlikely event of a catastrophic network failure, any local alarm will have prerecorded local messages played based on programming

Circle labels: Unicode Options · EST3-to-EST4 · Color Touch Screen · Remote Connectivity · Wire Count Reduction · Database Storage · Scalable · Flexible Network Configurations · Proxy Firewalls · Pre-recorded Messages
