

SOLUTIONS FOR COMMERCIAL OFFICE BUILDINGS

CREATE THE BEST WORKPLACE ENVIRONMENT AND EXPERIENCE

Commercial buildings serve as workspaces for a wide range of businesses, from small enterprises to large corporations, and vary significantly in size, design, and functionality. These buildings support various business operations such as administrative tasks, client meetings, and corporate management.

Building owners, operators, and property managers today are challenged with enhancing the experiences of occupants while also improving building efficiency. Our [WebCTRL® building automation system](#) (BAS) delivers the precise control necessary to help achieve these goals.

WebCTRL®

MEETING COMMERCIAL OFFICE BUILDING NEEDS

Automated Logic is uniquely positioned to help address some of the most common industry challenges:

Maintain Comfort and Productivity

Comfort and indoor air quality (IAQ) significantly influence health and cognitive performance. To maximize occupant productivity and well-being, the WebCTRL system maintains precise control of temperature, ventilation, and IAQ in office workspaces.

Reduce Energy Use and Operating Costs

Gain efficiencies by integrating lighting systems, deploying utility incentive programs like Automated Demand Response (ADR), and employing WebCTRL tools like occupancy scheduling, optimal start/stop, and the Environmental Index™ to help save energy in your facilities.

Attract and Retain Tenants

By optimizing energy efficiency, comfort, and security, the WebCTRL system helps make your properties more appealing to tenants. Our occupant app can also connect tenants directly to building systems, offering seamless access to parking garages, doors, elevators, and individual temperature control.

Meet Sustainability and Compliance Standards

The WebCTRL system enables commercial building operators to meet LEED and Energy Star standards, reduce their carbon footprints, and ensure sustainability and compliance through efficient energy management and reduced environmental impact.

COMPREHENSIVE COMMERCIAL OFFICE BUILDING SOLUTIONS

Our [office solutions](#) help create comfortable, healthy, and energy efficient environments.

- Building Automation & HVAC Controls
- Environmental Monitoring & Control
- Environmental Compliance Reporting
- Energy Monitoring & Conservation
- Energy Dashboards
- Energy Rebates
- Data Visualization
- Data Archiving & Trending
- Indoor Air Quality Management
- Systems Integration
- Analytics & Fault Detection
- Critical Alarming
- Safety, Security, & Occupant Wellness
- ESG Compliance Reporting
- Predictive Maintenance

COMPLETE SOFTWARE SUITE

ABOUND | Net Zero Management

Improve visibility and tracking of energy usage and greenhouse gas (GHG) emissions so you can take action and report on progress.

ABOUND | Predictive Insights

Enable proactive maintenance strategies and manage your facilities more effectively with advanced data analytics and advisory services from our staff of experts.

Automate your building for improved comfort and efficiency with our industry-leading building automation system.

SUCCESS STORIES

ASHRAE Global Headquarters turned to Automated Logic to help manage and showcase their net-zero-energy building performance in Peachtree Corners, Georgia. The 67,000 ft² facility utilized the WebCTRL® building automation system to manage all of their building systems through a single user interface, helping them keep occupants comfortable and manage energy conservation measures. In addition, energy dashboards were deployed throughout the facility to highlight system performance for employees, members, volunteers and visitors.
